

Program 6:

```
package mounika6;

class MyException extends Exception{

    String str1;

    MyException(String str2) {

        str1=str2;

    }

    public String toString(){

        return ("MyException Occurred: "+str1) ;

    }

}

class Example1{

    public static void main(String args[]){

        try{

            System.out.println("Starting of try block");

            // I'm throwing the custom exception using throw

            throw new MyException("shoe me error boss");

        }

        catch(MyException exp){

            System.out.println("excuse me") ;

        }

    }

}
```

```
System.out.println(exp) ;
```

```
}
```

```
}
```

```
}
```
